OBJECTIVE

Highly skilled React JS Developer with 1+ years of experience in building dynamic and responsive web applications. Proficient in leveraging React JS, Redux, and other modern front-end technologies to deliver high-quality user interfaces and seamless user experiences. Adept at collaborating with cross-functional teams to design, develop, and deploy scalable solutions. Strong background in integrating with backend services, optimizing performance, and adhering to best practices in coding and testing. Committed to continuous learning and staying updated with the latest industry trends and technologies.

SKILLS

- React JS
- Node JS
- Express JS
- MongoDB
- HTML&CSS
- Problem-Solving
- Attention to Detail
- React Hooks
- Tailwind
- Git
- Responsive Web Design
- Excellent Communication

EXPERIENCE

JUNIOR REACT JS DEVELOPER

Feb 2024 – Present

DOCME CLOUD SOLUTIONS

- Develop and maintain web applications using React JS and related technologies.
- Collaborate with UX/UI designers to translate design wireframes into responsive and interactive user int.
- Write clean, efficient, and reusable code following best practices and coding standards.
- Integrate with backend services and APIs to fetch and display data dynamically.
- Optimize application performance for speed and scalability.
- Conduct code reviews and provide constructive feedback to peers.
- Troubleshoot and debug issues to ensure application stability and user satisfaction.
- Implement state management solutions such as Redux or Context API for complex application states.
- Stay updated with the latest industry trends and advancements in React JS and frontend development.
- Collaborate with cross-functional teams to ensure seamless integration of frontend and backend components
- Write and maintain documentation for code, processes, and application features.

MERN STACK DEVELOPER INTERN

Feb 2023 - Oct 2023

FUTURA LABS

- Collaborate with senior developers to design and implement application features.
- Write and test code for both frontend (React.js) and backend (Node.js/Express.js) components.
- Support database management tasks, including designing schemas and writing queries with MongoDB.
- Integrated third-party APIs and external services into applications to enhance functionality.
- Debug and troubleshoot issues to ensure smooth application functionality.
- Participate in code reviews and contribute to improving code quality and best practices
- Assist with integrating APIs and handling asynchronous data fetching.
- Document code and development processes for future reference and team collaboration.
- Perform research and stay updated on the latest MERN stack technologies and best practices.

- Contribute to project planning and provide input on development timelines.
- Support team members in various tasks and projects as needed.

PROJECTS

MOVIE APP

MERN stack movie app featuring comedy, popular, and latest movies
Effortlessly find your favourite movies with a real-time API-powered search button.

SHOPPING CART

React-based shopping cart with CRUD operations and local storage

Source code: <https://github.com/Libin510/ShoppingCart>

E-BOOK STORE

Secure E-Book store with admin/user roles, MongoDB

Designed an admin panel for efficient management of e-book inventory

Source code: <https://github.com/Libin510/E-Book-Store.git>

KERALAWONDERS

Developed a dynamic Kerala tourism website from scratch, showcasing my skills in React.js.

Integrated a custom API to fetch detailed tourism information, enhancing the user experience with real-time data.
